DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, drawn to device (optical attenuator), classified in class 385, subclass 140.
 - II. Claims 8-16, drawn to method (of making MEM, SOI substrate), classified in class 438, subclass 50.
 - III. Claims 17, drawn to device (micro-actuator), classified in class 310, subclass 309. The inventions are distinct, each from the other because of the following reasons:
2. Inventions II and I/III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product III (micro-actuator) can be made by process other than forming the optical attenuator I/II. In the instant case the product I (optical attenuator) can be made by a process other than preparing the SOI substrate, rather just preparing a silicon substrate.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Attorney Hauptman on 9/9/04 to request an oral election to the above restriction requirement, but did not result in an election being made. Jane Katsarelis has requested a copy of the election/restriction requirement be provided.
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
